Skills

Programming Languages: HTML, CSS, SASS, JavaScript, Ruby, and SQL

Frameworks and Libraries: Rails, Node.js, Express, jQuery, Sinatra, Bootstrap, Mongoose

Other Skills: Git, Heroku, MongoDB Atlas, GCS, MongoDB, PostgreSQL, API's, Agile, Linux

Projects

CampQuest - (campquest.herokuapp.com) - Users can create posts on campsites and receive feedback from other users via a comment section. Users can also view exactly where the campsite is located due to the integration of Google Geocoding API. This web application was built with Node.js, Express, MongoDB, and Bootstrap. ([view code](#))

Community-Chest - (community-chest-nyc.herokuapp.com) - A full-scale web application that allows users to post items, interact with each other via a messenger, and ultimately meet up to complete the transaction. Users also have the option to purchase a premium account where they will have the ability to view an unlimited amount of posts. This project was created with the collaboration of four other developers. My responsibilities for this project were to set-up an authentication and authorization system from the ground-up, work on the navigation and category page for better user experience. This web application was built with Ruby on Rails, Javascript, PostgreSQL, and the Stripe API. ([view code](#))

Admin Panel - (ap-chris.herokuapp.com) - An administrative panel for a generic school that allows an admin to perform typical CRUD actions. Admins can perform these actions for students, instructors, cohorts, and courses. This web application was built with Ruby on Rails, jQuery, PostgreSQL. ([view code](#))

Rumblr - (rumblr-christopher.herokuapp.com) - A tumblr inspired, space-themed social media website where users can create posts of topics of their choosing. In this project, my primary goal was to create an eye-catching landing page with CSS. This web application was built with Ruby and Sinatra. ([view code](#))

Experience

Administrative Assistant

Touro College, Brooklyn, NY

01/2013 – 01/2018

- Data Management with the colleges IBM DB Software.
